Trade on sideswap.io from your wallet

Trade on sideswap.io with the SideSwap wallet you already have. Swap at the market price or place a limit order, and approve every trade in your wallet. Your coins stay in your wallet until the trade settles.

sideswap.io/guides/trade-on-sideswap-io · Updated 9 Oct 2026

At a glance

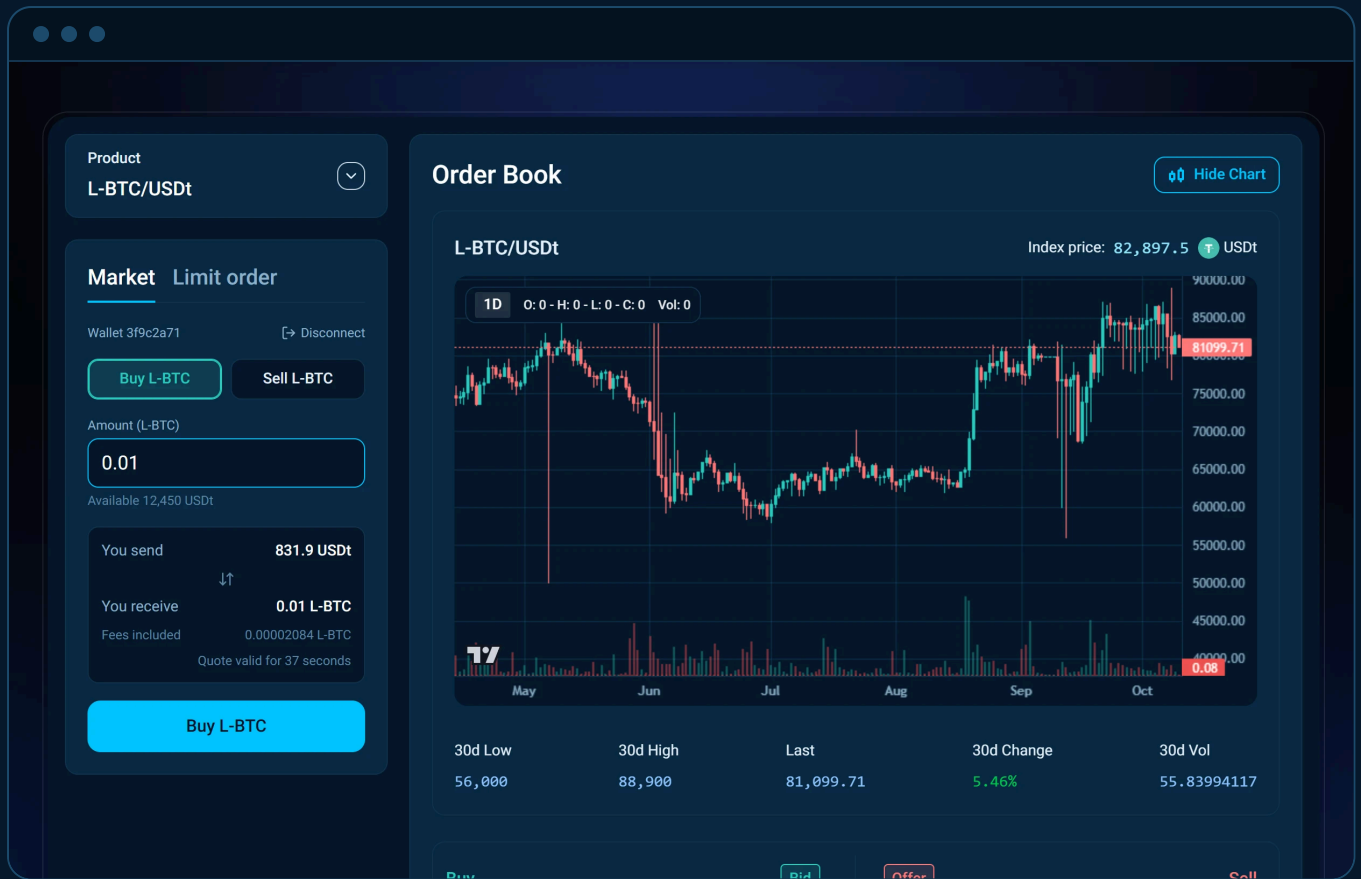

Where	sideswap.io, Swap Market
Your wallet	SideSwap on your phone or computer Connected with Liquid Connect
Market swap	A firm quote, fees included Each quote is valid for a short time
Limit order	Rests until filled or cancelled One approval in the app
Fees	0.2% on a market swap Plus a small network fee. Your limit orders pay no trading fee
Custody	None Every trade settles directly between wallets

Before you start

- ✓ Your wallet connected to sideswap.io. See [Connect your wallet to a website](#).
- ✓ L-BTC or USDt in the wallet, in confidential coins. The page says if part of a balance cannot be swapped.
- ✓ The page and the wallet on the same network.

The Swap Market page

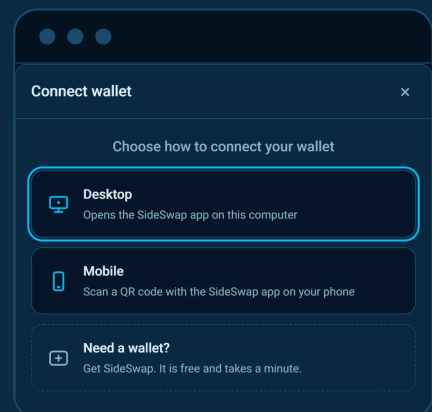

Trading sits on the left, the order book and the chart on the right. Choose a product such as L-BTC/USDt, then **Market** to swap now or **Limit order** to name your own price.

Swap at the market price

1 Connect your wallet

Open sideswap.io/swap-market and click **Connect wallet**. Choose Desktop for the app on this computer or Mobile for the app on your phone, then allow the connection in your wallet.

2 Choose a side and an amount

On **Market**, pick **Buy** or **Sell** and type the amount. The page shows a quote with what you send, what you receive and the fees, all included. A new quote follows when the old one runs out.

The screenshot shows the Sideswap.io web interface. At the top, the 'Product' is 'L-BTC/USDt'. Below this, the 'Market' tab is selected, and the 'Limit order' tab is also visible. The wallet address '3f9c2a71' is shown with a 'Disconnect' link. There are two buttons: 'Buy L-BTC' (highlighted in red) and 'Sell L-BTC'. The 'Amount (L-BTC)' input field contains '0.01'. Below this, it says 'Available 12,450 USDt'. A quote box shows: 'You send 831.9 USDt', 'You receive 0.01 L-BTC', and 'Fees included 0.00002084 L-BTC'. It also states 'Quote valid for 37 seconds'. At the bottom, there is a large red 'Buy L-BTC' button.

3 Approve it in your wallet

Click the Buy or Sell button. Your wallet shows the request from sideswap.io. Under Balances it lists what leaves your wallet and what arrives. If the figures match the quote, approve it. If not, tap **Reject**.

The screenshot shows a mobile wallet interface. At the top, it says 'Liquid Connect: Signature Required' and 'sideswap.io'. Under 'Balances:', it shows '-250.00 USDt' and '+0.00405 L-BTC'. Under 'Recipients:', it shows two entries: '1q1qqw8f...t3xk9' receiving '0.00405 L-BTC' and '1q1qq8m2v...a41pdc' receiving '250.00 USDt'. Under 'Network fee:', it shows '0.00000121 L-BTC'. At the bottom, it says 'Time-to-live: 38 seconds' and has two buttons: 'Broadcast' (highlighted in red) and 'Reject'. The Sideswap.io logo is at the very bottom.

4

Swap sent

The page says **Swap sent**. Follow **View transaction** to see it on the explorer, or start a **New swap**.

Place a limit order

1

Name your price

Open **Limit order**, pick Buy or Sell, then type the amount and your price. The page adds up the total. Click **Submit**.

Product
L-BTC/USDt

Market Limit order

BUY SELL

Amount
L-BTC 0.05

Offer Price
USDt 84500

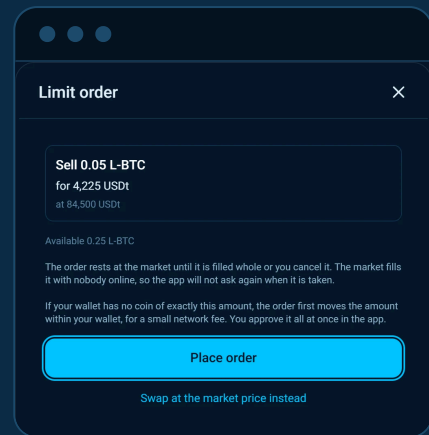

Total: 4,225 USDt

SUBMIT

2

Check the order

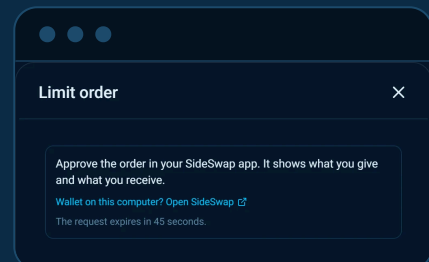

The order rests at the market until it is filled whole or you cancel it. It fills with nobody online, so your wallet will not ask again when it is taken. If your wallet has no coin of exactly this amount, the order first moves the amount within your wallet for a small network fee. Click **Place order**.

3

Approve once in your wallet

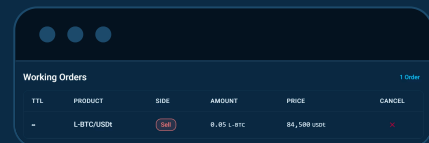

Your wallet shows what you give and what you receive. You approve it all at once, including the move within your wallet if one is needed.

4

Your order rests

The order appears under **Working Orders** at the bottom of the page. Cancel it there at any time before it is filled.

Good to know

No answer arrived

If the page loses track of a swap or an order, check the transactions in your wallet before you try again, so you do not trade twice.

Coins that are not confidential

The market takes confidential coins only. If part of your balance is in coins that are not, the page says how much cannot be swapped.

No offer for this amount

There is no offer for that size right now. Try a different amount, or place a limit order at your price.

On a phone

On a phone the page opens the SideSwap app for each approval and brings you back afterwards. The mobile wallet has no market tab of its own. It swaps with Instant Swap, and trades here.

The desktop app

The desktop app has the full Swap Market built in, including the AMP markets. An AMP market cannot be traded from this page.
